October 24, 2017

Dear Sir / Madam:

I am a recent graduate from George Brown College in Toronto, Ontario and am excited to start my professional career as a computer programmer.

In addition to completing four years of formal training, I have spent much time teaching myself various computer languages to further enhance my expertise. I have a logical mind and thrive on problem-solving situations.

While attending college for video game programming, I completed a one-year internship with a subsidiary of 13AM games. During my time, I served as the UI programmer that helped with game-play mechanics. After the 3<sup>rd</sup> years graduated and left the team, I took over as the AI programmer.

This internship has greatly helped me to obtain the crucial skills and knowledge required to become successful in my chosen field. It has also given me the confidence needed to succeed in a competitive environment.

My most current project, to date, is the development of a customizable and pluggable desktop application called MyAnimeViewer. Upon completion, this program will make for easier tracking of watched and upcoming programs by combining your favorite anime list databases in simulcast platforms.

I appreciate the opportunity to meet in person to further discuss my abilities and find out more about what you are looking for. Please feel free to call me to arrange a date and time that works for both of us.

Thank you for considering me for this position.

Sincerely,

Andrew Gray
