April 2019

Dear Sir / Madam:

I'm currently employed with Trilogen Technologies Inc. and am a graduate of George Brown College as a Computer Programmer Analyst. While it has been a great experience with Trilogen, I look forward to further developing my programming skills.

In my employment at Trilogen Technologies, I have the privilege of working with a major financial institution. Some of my responsibilities are scanning, identifying and remediating security vulnerabilities, as well as, reviewing my peers code to ensure secure coding practices have been taken. When I am not working with the security of our application, I am busy with the documentation and implementation of new requirements and integrating them into our system.

Developing great time-management skills has allowed me to juggle several tasks and projects simultaneously. I have also gained great flexibility, allowing me to work around and integrate any spontaneous and unforeseen requirements that may arise. With this, I have been able to accomplish all tasks thrown my way with high efficiency and accuracy.

Within Trilogen, I have worked with new projects starting from the ground up, as well as adding, maintaining and fixing existing applications. I enjoy being challenged and engaging with projects that require me to work outside my comfort zone and knowledge set, as continuing to learn new languages and development techniques are important to me and the success of your company.

I look forward to meeting in person to further discuss my abilities and opportunities with your organization. If interested, please feel free to contact me by phone or email at anytime to arrange a mutually convenient time.

Sincerely,

Andrew Gray
